

Σ ed. 3, Ex 3.01 (p 58)

$$1^{\circ} \quad E(T) = n\mu \quad \mu = 15, \quad \sigma = 4 \quad n = 9$$

$$= 9 \times 15$$

$$= \underline{135}$$

$$SD(T) = \sqrt{n} \sigma$$

$$= \sqrt{9} \times 4$$

$$= \underline{12}$$
